Simple Electronics Projects for Beginners. This article is a collection of simple electronics circuits we have published over a span of 3 years, which can be used as simple electronics projects for students, beginners,

Page 13/89

project-in-electronics-circuit

engineering students and other hobbyists. The following circuits listed below can also be used for your mini project needs.

Simple electronics projects and circuits

This circuit is intended to signal

through a flashing LED, the exceeding of a fixed threshold in room noise, chosen from three fixed levels, namely 50, 70 & 85 dB. Two Op-amps provide the necessary circuit gain for sounds picked-up by a miniature electret microphone to

Page 15/89

drive a LED. With SW1 in the first position the circuit is off.
